

Tradetime Strength Meter

The Proof Is In the Puddin'

Testimonials

All these testimonials are real people, real forex traders. The original emails are kept on file.

I Double My Trading Capital Every Month, Making Over \$20,000/month

I have had **phenomenal** results with an average of a little over 4% daily gain on my capital.

This means **I double my trading capital every month** if I don't pull profits out. I can't thank you enough. This past year with the US economy going a little soft my job in home improvement sales has been progressively more difficult.

With a little bit of study and your course I have been able to take your system and now have a "second" job **making over \$20,000 a month**. The key was to try and take it a few pips at a time and not worry about swinging for the fence and the elusive 100 pip trade. Your system and the concept of producing small daily gains and tracking my progress every day has changed my life.

Thanks a million (headed that way)

Chris Chandler

The "Can't Live Without" Tool For My Trading

If you're reading this you've undoubtedly already heard about all the great things people have had to say about the Currency Strength Meter, and I've experienced a lot of the same results that everyone else has.

But more importantly, besides helping you find great trades, I've found that the ForexGrail does a phenomenal job of **KEEPING YOU OUT OF TRADES** that you otherwise might have gotten into without it. For that purpose I find the Grail an indispensable tool.

The Strength Meter gives me clarity when things might not otherwise be so clear, and the bottom line is that since I've been using it I keep way more PIPS in my account. The ForexGrail has become the "can't live without" tool for my trading. It's made trading FUN again.

Pat Curley
Long Island, NY

P.S. I've included a one month trading record statement as proof for the period of June 16, 2008 to July 14, 2008

Trading Without It Is Like Driving My Car Without Headlights

I have been trading with the assistance of the ForexGrail for several months. I liken my trading without it to driving my car without headlights. With it I can tell where i need to go. Knowing which currency is strong and which is weak shows me which pairs to trade, knowing how strong and how weak tells me which trade will be successful. The ForexGrail has removed the guess work about a currency moving up or down, and has helped make me a profitable trader.

Euell Franks

A View of the Markets People Seldom Think About

The ForexGrail shows a view of the markets people seldom think about, and a view that no other indicator can....Real Time strength and weakness. Turns a simple moving average cross over system into a money maker. With Tom's tool you can make those systems that only worked some of the time....work most of the time. The ForexGrail is a true innovation and a key to your Forex success.

Jeff N

The Guiding Light . . . Couldn't Trade Without It

I have been using the ForexGrail for approx. 1 year. My day starts with the Grail. It is the guiding light to identify which currencies I want to follow that day. I will monitor the spotter for at least 1 hour before I begin to look for entry and exit points. Many times the Grail has kept me in trades that started badly only to turn positive over the next 30-60 minutes. Couldn't trade without it!

Thanks a million

Don

Wouldn't Think About Pulling the Trigger Without It

Have been trading part time the last 4 years. Have read a lot and tried a lot. Started using the ForexGrail 3 months ago. Nothing replaces experience, patience and discipline, but now I wouldn't even think about entering a trade without using the meter. It's become a necessary tool. Wouldn't think about pulling the trigger without using it.

Mark Selent
Ohio

The ForexGrail is Different

This is the first testimonial I have ever given. Most of the tools and systems sold to Forex traders just do not add any value. The ForexGrail is different. Apart from candle charts it is the only other tool I use. Only two days ago it gave me the supporting information to make a successful NZDUSD trade. I look for a set up and then check with the ForexGrail for the relevant strength and weakness. Thanks for making it available.

Regards,

Martin Butler

Essential Part of My Trading "Toolbox"

With regard to the ForexGrail I have found this to be an increasingly essential part of my trading "toolbox". In these turbulent times with lurid headlines and an oversupply of "non trading" experts, it is great to be able to see the wood from the trees by knowing which pairs really are the best to concentrate on at any particular time. I have found this tool to be invaluable and can only thank you sincerely for all your time and effort in producing such a wonderful aid.

Kind Regards,

Ray

My Profit Has Sky-Rocketed by 60%

I want to say that i came across the spotter in a cyber cafe with a fellow trader. I got a copy and it has made my trade more organized. It has helped me eliminate emotional ties with my trades.

When I first started using it, I made rash decisions. But then I listened to your advice and trusted the system. My profit has skyrocketed by 60%. The ForexGrail works. It really works amidst all the noise.

Thanks,

Madusha Emeka

200 Pips Is Not Uncommon

Now the " ForexGrail." I have been trading for only 6 months using only the TS for the last 2. I live in Toronto so I trade only the N.Y. session from 8-12am. This is the best time as the TS will produce 3-5 20-40 pip moves or at least 1-2 50-100 pip moves. Most days I'm done by 10:30.

I'll trade before, during and after the news . . . it doesn't matter . . . I just follow the TS.

The rule of trading is no trades 30-60 min. before and after the news but this doesn't apply to the TS really. My objective is 100 pips a day. Sometimes I'll stop at 75 or 80 .. once and awhile. . . Especially lately 200 pips is not uncommon. The key to trading the TS is not to watch the numbers but to use the TS as the primary chart and a brokers chart (I use MBtrading) as reference. North Finance has just as many pairs also.

Also letting price cross the 50 SMA and waiting for a pullback before continuing on works better than entering right away. In my first few months even though I had the TS I tried every indicator out there . . . because I was nervous and I was looking for certainty. . . but indicators are a recipe for disaster in a choppy market like in September.

Traders will often blame the market for trades gone wrong or won't trade for days or weeks due to volatility. . . not me. . . I trade everyday and there are no bad days because the TS will always grab at least 20 pips on a move.. The key is to watch for the crossing of any 2 currencies. . . it doesn't matter where. . . even if the 2 bottom currencies cross.. say Aud vs Cad moves from 2-3 to 4-3 that's a 20 pip move. . . TS is all I will ever use to trade FOREX because very few traders will ever do 100 pips a day in a couple of hours.

Chris

Before ForexGrail, I Was Trading In the Dark

I want to let you know that the ForexGrail trading system has been a very effective trading tool for me. I am fairly new trading currencies and was not doing very well, but after finding and trading with the ForexGrail I can see that I was trading in the dark.

If one follows the directions in the manual that comes with ForexGrail, one will make pips! I also want to say that I don't make a trade on any currency pair with out the ForexGrail, the spotter gives me the information I need when to stay in a trade or when I need to close the trade.

Thank you very much for the ForexGrail,

Thomas Smith

50-100 Pips A Day

I have been using the ForexGrail for some time quite successfully when daytrading. Lately I have been unable to daytrade and wished I had a version that runs on longer terms. I do trade with 4 hrs charts when away for longer periods of time. The profits are lower but still very acceptable doing 50 to 100 pips a day.

Thanks for your work.

Best regards,

Felix Irrniger
Switzerland

An Indispensable Tool in My Daily Trading

The ForexGrail has become an indispensable tool in my daily trading. Not only does it give me a continuous and straightforward strength vs. weakness heads up, it **also has been useful as an integral part of my other trading systems**, confirming short term trends and the longevity of such. I even use it in a Trade room I participate in to assist in the identification of potential trades and to help me decide how long to stay in.

Thanks for your fine work in producing the quintessential trade tool!

Sincerely,

David Perkins

Excellent Trading Tool . . . Helps You To Trade With The Real Trend

This is what I want to say about the The ForexGrail:

I think that the FX ForexGrail is a very powerful trading tool. After more than a year trying to find sound principles I could base my trading plan on, I've come to the conclusion that simple is best. And when I say simple, I mean just 3 elements:

- 1- Currencies' strength
- 2- Support and resistance levels
- 3- Risk management

So, I've taken away all the technical indicators (Bollinger Bands, MACD, Ichimoku, etc, etc) that only made my screen (and my trading account) looked like a mess, and only concentrated on currencies' strength and price levels.

The first one who introduced me into the importance of currencies' strength was Jimmy Young who is an accomplished trader. So, as soon as I knew about ForexGrail, I decided to include it in my trading toolbox. After some time, it proved to be an EXCELLENT TRADING TOOL.

Let's think about a very simple example such as a trendline or a channel breakout. If you know beforehand what currency is driving the market, i.e. what's the strongest or the weakest one, you can anticipate if the breakout is going to be successful or not -just a fakeout.

And right here is when the ForexGrail comes in extremely handy, since it shows what currency is the strongest/weakest one. And this is only one example among many others (market sentiment trading, news trading, etc), in which I could show you why the ForexGrail is so useful.

The The ForexGrail helps you to trade with the real trend, i.e. the trend which the broker can't manipulate.

Best Regards,

Fernando Anziano

ForexGrail Is My Trump Card in Forex Trading

It is the ForexGrail that is my trump card in my Forex trading strategy.

When I first started using the Spotter, I was amazed at the time and effort it saved me in making sense of the currency fluctuations. It set me free from the harrowing task of constantly monitoring multiple currencies.

Recently I have discovered another invaluable use of the ForexGrail: monitoring the impact of news releases on various currency pairs. For example, whenever there is some important news release, a quick glance at the ForexGrail reveals the degree of the impact on various currencies in real-time. The ForexGrail clearly shows me which news category impacts the Forex markets the most, which helps me discard the ineffective news releases in my trading strategy. I think the true value of the ForexGrail is that it is not some sort of mathematical mumbo-jumbo contraption pretending to be useful like so many other offerings on the internet.

The ForexGrail does not deal in debatable "probabilities" but in hard -core facts. It reveals the true state of the Forex market as it exists at any given time of the day or night.

Whoever said the ForexGrail is the next best thing to the "Holy Grail of Forex " was not too far off the mark.

I want to thank you for coming up with something truly useful in Forex trading. I have tried umpteen "Forex trading systems", spent thousands of dollars in the last 7 years of my Forex trading endeavors and have never come across anything like the ForexGrail. Forex trading has never been so effortless as with the the ForexGrail. Keep up the excellent work.

NARINDER JAKHAR

Generated Some Great Returns on My Investment Capital

Been using the meter for a couple of months now, what a GREAT tool to have.

I'm using it as visual aid and also as a way to correlate currencies. This correlation of one strong currency paired with a weaker one has generated some great returns on my investment capital.

Keep up the great work.

Best Regards,
Sam Williams

Improves My Chances of Finding a Winning Trade By 100%

I just wanted to give you my feedback on your ForexGrail. Your spotter is the best indicator out there hands down. I now don't make a single trade without consulting the meter first.

Not only does it improve my chances of finding a winning trade by 100%, but **it also keeps me out of bad trades** that normally I would have taken - which is vastly more important than most people realize.

So many times have I been ready to enter a trade using my normal strategy but the meter is screaming at me no!!! And sure enough I would have lost on that trade using a signal that normally would have looked absolutely perfect to me.

Avoiding bad trades alone is huge because that can turn any 50/50 system into nearly a 100% system, and then pile on the additional winning trades on top of that and it is almost exponential.

Also, I keep finding more and more ways to use the spotter. For example, **I can find breakouts ahead of time**. If the markets are moving, but one pair hasn't moved yet and the spotter is showing a nice variance on that pair, guess what, it's going to breakout soon in the direction the meter is diverging on. Please feel free to use this as a testimonial if you would like. Thank you for sharing your spotter.

Brent Stanley

It's the "Killer App" for Forex Trading

I have been using your ForexGrail for several months. It's the "killer app" for Forex trading. What's lovely for me is that it provides the re- assurance needed for any trade I make; whether a particular currency pair makes trading sense at a particular time. A must have in any Forex trader's arsenal.

Cheers,

Roger

The ForexGrail Tells It All!!

I've been searching so long to know how to trade profitably. I wonder what makes the price move up and down and how to know that in advance. Indicators are not reliable, giving late signals, and often conflicting with each other.

Fortunately, I found the fx ForexGrail and everything becomes clear and make sense to me. The price moves because one of the pair is stronger than the other.

And the ForexGrail tells it all!!

So far, I'm more than happy to use the ForexGrail. And I thank you for the great support in giving answers to all of my questions right away.

Regards,
Ronald Wirawan
INDONESIA

I Only Use . . . ForexGrail to Make a Great Living

I have my own setups, but have to tell u that every setup I get need to be confirmed by ForexGrail. Never trade against it. It's the best tool that I have to trade. I hate indicators, so I only use price action + candles + ForexGrail to make a great living from trading. Don't need more.

Thanks.

Andres Angel A.

The First and Last Port of Call for All My Trading Decisions

The First check before I look for ANY trade is the ForexGrail.

The Last check before I enter ANY trade is the ForexGrail.

If there is NO strength and NO weakness then there is NO trade.

Simple as that!

The ForexGrail has become an integral part of my trading system and remains the first and last port of call on which all my trading decisions are made.

Without knowing where the strengths and weaknesses lie in the FX market you are trading in the dark. The ForexGrail helps to shine the light for you on which way to go.

David Marshall

Now I Can See the "True Trend"

Until I was introduced to the the ForexGrail, I was trading blindly, now I can see the "True Trend" of the markets by matching a strong currency with a weak one. Combine this with a simple trading system; I've now been able to win on a consistent basis. Thanks for sharing.

Best regards,

Rob Renk

Significantly Changed My Life and the Lives of My Family Members

I want to thank you for the great tools you've created for successful Forex trading. I've been making enough profit in my day trading to significantly change my life and the lives of my family members. My wife who has some serious health issues no longer has to work full time and can concentrate solely on healing herself.

My son has now shown an interest in trading using your methods and there will be nothing more gratifying to me as a parent than to be able to teach him how to do this so he will never have to worry about his financial future again.

I have consistently made 20 to 30 pips a day on the days that I trade, but the real success that I've attained with your methods is knowing when NOT to trade so I am not giving anything back to market once I've booked the profits.

All I can say is thanks again and I look forward to more and more success in trading your methods in the future.

Sincerely,

**Chris S.
Connecticut**

I Use the ForexGrail Every Day

I use the ForexGrail meter every day. It is on one screen and ODL is feeding the information to the meter. Oanda is on another screen waiting for me to place a trade.

This morning while setting up for the day, the meter showed a good size gap between the USD and the EUR. Put in a EUR/USD Sell at 1.3774 and rode it down to 1.3764 for \$100 to close the position just as my wife called me for breakfast. The account history shows in and out in one minute. It is attached.

It has since gone back to a buy and gone 1.3780 up to 1.3810 and looking like time to close the trade.

Good job.

Thanks

Wayne Kroutil

The Spotter Becomes a Sort of Friend I Constantly Refer to for Confirmation

I have been using the ForexGrail for almost a year now and I have it running on its own dedicated screen for good reason. If I have a set up that I am waiting to trigger, usually the trend change on the spotter can be spotted taking place at the same time.

After a while, the spotter becomes a sort of friend that I constantly refer to for confirmation that the pair that I am trading is going the way of my trade.

I always avoid trading against its readings. I also watch for the nuances of a trend strengthening in order to add to positions. There are many ways to use the spotter to your advantage and its fits in with any trading method.

I Have Quit My Day Job and Trade Forex Full Time Now

The The ForexGrail has allowed a Forex beginner, such as myself, to maintain a consistently profitable portfolio with minimal risk.

As I have ventured on to my own technical systems the The ForexGrail has supercharged the profitability of those signals and minimized the risks in entering a trade.

Because of the The ForexGrail, I have grown my very small account to the point of allowing me to quit my day job and trade forex full time. As a husband and a father of two young children I am thrilled to have the freedom to spend with my family.

I have recommended this software to several of my friends and continue to speak highly of it at every opportunity. If you are interested in conservative profitable trading I recommend that you become an avid student of the The ForexGrail.

Many thanks again and may the trend be with you!

David Lee, California"

Thank you again,

Dave

Better Insight Into Trends and When to Enter/Exit My Trades

I love the The ForexGrail you created. It is extremely helpful. As you know, once a direction is established on a pair it is likely to trend in that direction for several sessions (London / NY as an example). The meter gives me better insight in regards to trend and when to enter / exit my trades.

Kind regards,

Nancy Golly
Atlanta, GA

Focused My Trading to Viable Pairs and Allowed Me To Catch Moves

The The ForexGrail is the first item on my Trading Plan. As I prepare to trade, I check the ForexGrail for currency pairs that exhibit the largest strength/weakness spread, and then start my analysis on the charts for those pairs. It has focused my trading to viable pairs and allowed me to catch moves rather than miss good moves while I am randomly searching pair after pair for possibilities.

Thanks for a great tool,

Loni Hopkins

Allows Me to Filter the Opportunities and Select the Best Candidates

I have personally used the The ForexGrail on a regular basis in my trading for the last nine months. In that time it has become so much a part of my decision-making toolset that, in some ways, I'm not even aware of it anymore. I'd sure know it if it wasn't there. But, it is such a great way to visualize the energy flow across the currencies in a snap, that it is now just a natural part of my "market reading" dashboard.

Even when it doesn't signal trading opportunities on its own, which it does at times, it allows me to filter the opportunities that I see in my other methods, and select only the best candidates for trading.

Thanks for a great tool,

Stan Hoffman
Knoxville, TN

I've Almost Doubled My Weekly Profit Average

As you know I've been among the first to adopt the The ForexGrail.

I wish to underline how much this simple (in appearance) tool has helped me greatly improve my Forex daily trading performance...

I personally concentrate on day-trading and scalping, particularly on the GBP/JPY and EUR/JPY pairs due to their above average ATR, as well as recurrent fluctuations, even though I also trade the EUR/USD, GBP/USD, USD/CHF and USD/JPY routinely now, thanks to the ForexGrail which keeps me informed on How Each Currency is performing at any time therefore allowing me to avoid wasting time on the wrong pairs and immediately take action on the right pairs...

Consequently **I've almost doubled my weekly profit average**, and while I was already making a very comfortable living off my trading before, **I am now generating enough surplus to start an "Angel" type Investment Fund**, dedicated to helping young Entrepreneurs whom, in my country, can't obtain any help from Banks, and allows them to jump start their business...

And that makes me happy and keeps me young!

Which is why I care to thank you again for providing us with this great tool.

Wishing you and your family the best,

Bruno Galardi Este

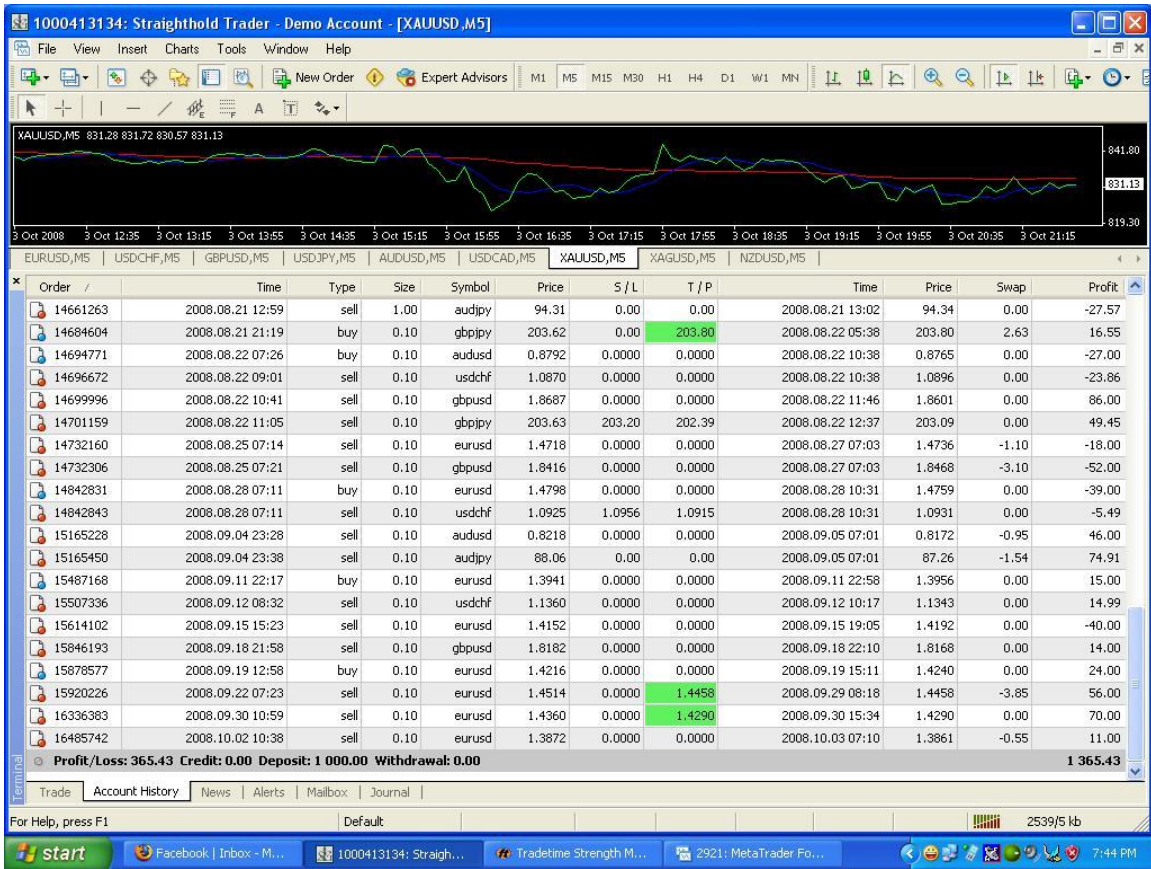

Even a 10 Year Old Child Can Spot a Developing Trend

Am new to Forex trading. But since I bought the ForexGrail my trading has really improved. This is the best tool I have ever seen in trading currency.

With this tool even a 10yr old child can spot a developing trend. This is the best tool I have seen. It is very easy to use, easy to understand and very easy to comprehend. I have been able to make \$365 profit using the ForexGrail. The beauty of the ForexGrail is that I can trade at midnight also.

Again I say this is the best in Forex world.

Thanks.

Below is the only testimonial really worth seeing.

Richard Fudalej

A Definitely Imperative Tool for Scalpers Like Myself

After purchasing your ForexGrail, my trading accuracy has improved tremendously. I used to check currency strengths by looking at 10 or more charts on different monitors and believe me, it was tough.

After using your meter, it achieves the same purpose of checking charts, just that this is much more effective, fast and visual. When I see red, I'm getting ready to buy and short when I see blue. It can't get any simpler than that.

A definitely imperative tool for scalpers like myself.

Thanks very much.

Anthony Lai

I Was About to Quit Trading . . .

I started trading Forex in 2006, during my first 15 month I blown my 3 accounts. I lost my hope on Forex trading and I was about to quit. Then I was introduced to the ForexGrail which again added some strength to my trading. With your email guidance and user document I was able to understand the meter pretty fast.

First I did some experiments on my virtual account and the results were awesome and I later I started using my real account. In one word if want to say, I LOVE THIS FOREXGRAIL. I would say I have made more pips using this currency meter than any other subscription services.

Thanks!

Umesh Paduvagere

Greatly Puts the Odds in My Favour and Makes Good Trading Effortless

I learned my trading skills from a professional CTA and fund manager. The message across the board was: "Trade with an edge, manage risk, be consistent, and keep it simple! Simple time tested methods that are well executed will beat fancy complicated methods every time. The big money is made by sittin' and waitin' – not the thinking! Wait for your edge to show if factors are in your favour before making the trade."

The the ForexGrail is my edge that keeps it simple!

It's one of my few handpicked selections of easy to use master tools that show me those necessary factors (i.e.strength and weakness) at a glance. Whether I should sell rallies in a downtrend or buy dips in an uptrend is now an easy question.

After identifying suitable currency pair combinations with the spotter, the only thing left to do is to hop on board at the right moment. Personally, I use intraday support and resistance levels to get in just about an hour after London open or New York open, when price normally decides on its trend direction for the rest of the session.

The the ForexGrail greatly puts the odds in my favour and makes good trading effortless. Trading with such an edge separates the professionals from the amateurs.

You can't go broke by taking profits!
